Zoom™ OMAP35x Torpedo™ Development Kit

By providing a product-ready software and hardware platform, Logic PD's embedded product solutions fast forward development and help your company stay focused on its high-value core technologies. The Zoom OMAP35x Torpedo Development Kit is a low-cost, high-performance application development kit to evaluate the functionality of the Texas Instruments (TI) OMAP35x processors and the Logic PD System on Module (SOM).

Application development is performed right on the product-ready OMAP35x Torpedo SOM and software Board Support Packages (BSPs) included in the kit, which enables you to seamlessly transfer your application code and hardware into production. The included OMAP35x Torpedo SOM utilizes the superset OMAP3530 processor and allows for easy evaluation of both the OMAP3530 and OMAP3503 processors.

The ultra-compact OMAP35x Torpedo SOM is ideal for applications in the medical, point-of-sale, industrial, security, and consumer markets where space is at a premium. From point of care medical devices to bar code readers, handheld radios to mobile Internet devices, netbooks to CCTV cameras, the OMAP35x Torpedo SOM
